Tell us about your child's journey

Has your child developed differently than you expected?

We would like to hear from parents and carers of children aged 0-5 living in Barking & Dagenham.

Your child might:

- Have a SEND diagnosis
- Be waiting for an assessment
- Receive extra support
- Have speech, communication or developmental difficulties
- Have developmental concerns but are not currently receiving support

We want to hear about your experience

- Getting help and advice
- Accessing local services
- What has worked well
- What has been challenging
- What support would make the biggest difference for families

Your voice matters

The research has been commissioned by Barking & Dagenham Council and carried out by independent research specialists Apteligen. What you tell us will help improve understanding of the experiences of local families and shape future support and services.

Taking part

- Online or phone chat, at a time that suits you
- Around 30 minutes, or shorter if you prefer
- Completely confidential
- No specialist knowledge needed
